                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 10, Application US/10798579A

Publication No. US20060005201A1

GENERAL INFORMATION:

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: Agricultural Science

TITLE OF INVENTION: A production of plants having improved rooting efficiency and vae

TITLE OF INVENTION: A production of plants sessistant gene

TITLE OF INVENTION: Using environmental stress-resistant gene

CURRENT APPLICATION NUMBER: US/10/798,579A

CURRENT APPLICATION NUMBER: US/10/798,579A

CURRENT FILING DATE: 2004-03-12

CRGANISM: Bovine
COCATION: 3100..309
OTHER INFORMATION: Polypeptide fragment from treatment of fetuin from bovine ser
COTHER INFORMATION: described in the specification.
